

Akshay Krishna

Full-Stack Developer | ASP.NET Core | Angular | Oracle SQL | Fintech

akshaykrishna24996@gmail.com | +91 730 654 4148 | Thrissur, Kerala | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in enterprise-grade Fintech web applications, proficient in ASP.NET Core, Angular, Oracle PL/SQL, and RESTful API design. Delivered **8+ production systems** including mission-critical platforms processing thousands of daily transactions across CRM, lead management, workflow automation, and real-time analytics.

SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, HTML5, CSS3, PL/SQL, MongoDB

Frameworks & Libraries: ASP.NET Core, Angular (v17), React, Node.js, Express.js, Entity Framework, LINQ

Databases: Oracle 11g/12c, Stored Procedures, Triggers, Query Optimization, Data Modeling, MongoDB

Architecture & Practices: RESTful APIs, Microservices, API Gateway, WebRTC, Agile, SOLID, TDD, OOP, CI/CD

Tools & Platforms: Git, Visual Studio, VS Code, Swagger, Postman, IIS, SQL Developer, Vercel, Render, GitHub Pages

PROFESSIONAL EXPERIENCE

Software Engineer, Manappuram Finance Ltd (MAFIL)

Feb 2023 - Present · Thrissur, Kerala

- Core contributor to online gold loan platform — pledge controls, payment processing, and customer onboarding.
- Implemented Penny Drop NEFT verification with bank account name-matching, achieving **96% accuracy** and reducing manual verification by 40%.
- Led full-stack development of B2C CRM serving thousands of live customers using Angular v17 and .NET Core Web API; improved **response time and data-fetching efficiency by 40%**.
- Automated OTP and email workflow for authorized transactions, boosting **system credibility and performance by 30%**.
- Migrated legacy CRM module to modular Angular architecture with Web API integration, building core features from scratch.
- Architected centralized Oracle PL/SQL database layer (**50+ tables, 100+ stored procedures, 40+ triggers**) serving 8 interconnected production applications.
- Built Lead Management API Gateway with cross-service authentication, route optimization, and load balancing for secure external integrations.
- Developed Windows Service batch processor for daily lead conversion tracking — handles **1000s of transactions** with zero manual intervention.
- Designed Paperless Approval Workflow with hierarchical routing and MD-level controls, reducing **approval cycles by 60%**.

PROJECTS

CRC-CRO Application · ASP.NET Core, C#, Swagger, WebRTC

- Full-stack CRM & lead conversion pipeline with call centre module and real-time WebRTC click-to-call. Migrated legacy ITCportal system from scratch.

CRM — Online Gold Loan · .NET Core, RESTful API, Oracle SQL, Angular

- Customer relationship system for OGL product with complaint tracking, sales pipeline, CRC integration, and real-time analytics. Reduced support resolution time by 40%.

Lead Management API Gateway · ASP.NET Core, API Gateway, OAuth, Microservices

- Internal and public API gateway with cross-service authentication and load balancing enabling secure third-party integrations.

Paperless Approval Workflow · Web App, Workflow Engine, Document Management

- Hierarchical digital approval system with MD-level controls and internal collaboration channel. Eliminated manual paper processing; reduced approval cycles by 60%.

CRC Daily Scheduler · Windows Service, C#, Batch Processing

- Automated daily batch processor for lead conversion data. Handles 1000s of transactions with real-time reporting pipeline and zero-touch analytics.

Utility Tools (Personal) · HTML, CSS, JavaScript, GitHub Pages

https://akshay43215.github.io/utility_apps

- Suite of browser-based utilities (OCR Extractor, IP Tracker, Text Comparator, WebRTC Comm, Decision Spinner). Zero dependencies, fully responsive.

EDUCATION

Diploma in Computer Science & Engineering, Computer Science & Engineering, IPT & GPTC

Jan 2018 - Jan 2021 · Shoranur, Kerala
